

Site Membrane Installer

Due to SEL's continued expansion, we require experienced geomembrane installers. You must have experience in installing ground gas membranes systems and stormwater attenuation tanks and experience in using hot air welding equipment is preferred but full training will be provided.

The ideal candidate will have a logical method of thinking and a great eye for detail. You must be able to work both on your own, and as part of a team, working to deadlines. You must be able to plan your sequence of work and achieve an effective and efficient working process, accurately following written and verbal instructions and technical drawings.

SEL work on various construction sites around the UK, so travel and staying away during the week is a regular part of the job. As such a good work ethic is essential. You will work a minimum 40 hours per week, Monday to Friday. SEL will provide transport and pay for all accommodation plus a daily subsistence allowance.

Full training will be provided, applicants with a CSCS card are preferred, you must have a willingness to learn new skills, have a clean full UK driving licence and live within the northwest area. Company uniform and PPE provided, Tools and equipment provided.

Benefits of working with SEL:

- Operating for +21 years
- Respected in the industry
- A growing business
- Good rates of pay
- Promotion prospects
- 21 days holiday per year + BH
- Monthly pay
- Pension scheme

To apply for this role, candidates must be eligible to work in the United Kingdom. References and eligibility will be checked prior to employment commencing.

SEL are an equal opportunities employer. All applicants will be considered on their merits regardless of race, ethnic or national origin, sex, marital status, religious belief or sexual orientation.

Contact SEL now if you would become part of the team.
